When asked why they do not keep CURTAILING FLOWERS CRITI-CISED.

> In the September issue of the Ladies Home Journal an article appeared by Bernard Baruch, chairman of the War Industries Board, in which he suggested discontinuing the use of flowers so the men employed in greenhouses might be released to go out on and the like.

A flood of criticism was made, not only by florists but also by those engaged in other occupations; perhaps most from country people.

tion to the criticisms, but as all restrictions are off and war work at an end it is interesting to note the points made. The general tone of the comments

suggested that of all non-easential susinesses at all times, during war nd peace, one that could be permacently dispensed with, so the thouends engaged in the business might urn their attention to some useful, productive occupation, was the business of brokers who sell stocks. Probthis because it was understood that Mr. Haruch had been a stock broker some asked if he tould point to any ything to the productiveness or

vealth of the world The criticism of speculating odstuffs, and brokers who make it cossible, was general, and the question put at producing crops.

The theatrical, moving picture

opera performers and entertainers generally came in for a round of no time for people to witness buffoonry, least of all to spend money for that was needed by the Governent. Actors were classed as non producers, and it seemed to be con producing something that was needed tant so long as the trees are well The florists claimed that where grown, healthy and typical of the de- there was one florist there were more sired varieties.
